

Checklist for AAPOR TI

Survey: New Hampshire Pre-election poll

TI Disclosure Elements	Answers
1. Who sponsored the TI Research and who conducted it. If different from the sponsor, the original sources of funding will also be disclosed.	7 News/Emerson College
2. The exact wording and presentation of questions and response options whose results are reported. This includes preceding interviewer or respondent instructions and any preceding questions that might reasonably be expected to influence responses to the reported results.	See Below
3. A definition of the population under study and its geographic location.	Republican Primary Voters in New Hampshire
4. Dates of data collection.	February 8-9, 2020
5. A description of the sampling frame(s) and its coverage of the target population, including mention of any segment of the target population that is not covered by the design. This may include, for example, exclusion of Alaska and Hawaii in U.S. surveys; exclusion of specific provinces or rural areas in international surveys; and exclusion of non-panel members in panel surveys. If possible the estimated size of non-covered segments will be provided. If a size estimate cannot be provided, this will be explained. If no frame or list was utilized, this will be indicated.	Aristotle voter file of 236,286 registered voters with landlines and cell phones, and a random sample of 15,000 of landlines and cell phones drawn. The online sample was of 23 registered voters supplied by MTurk
6. The name of the sample supplier, if the sampling frame and/or the sample itself was provided by a third party.	Aristotle, LLC MTurk
7. The methods used to recruit the panel or participants, if the sample was drawn from a pre-recruited panel or pool of respondents.	MTurk uses opt in panels and not online ads to recruit participants
8. A description of the sample design, giving a clear indication of the method by which the respondents were selected, recruited, intercepted or otherwise contacted or encountered, along with any eligibility requirements and/or oversampling. If quotas were used, the variables defining the quotas will be reported. If a within-household selection procedure was used, this will be described. The description of the sampling frame and sample design will include sufficient detail to determine whether the respondents were selected using probability or non-probability methods.	See #5
9. Method(s) and mode(s) used to administer the survey (e.g., CATI, CAPI, ACASI, IVR, mail survey, web survey) and the language(s) offered.	IVR, Online, SMS to Online

<p>10. Sample sizes (by sampling frame if more than one was used) and a discussion of the precision of the findings. For probability samples, the estimates of sampling error will be reported, and the discussion will state whether or not the reported margins of sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors. Disclosure requirements for non-probability samples are different because the precision of estimates from such samples is a model-based measure (rather than the average deviation from the population value over all possible samples). Reports of non-probability samples will only provide measures of precision if they are accompanied by a detailed description of how the underlying model was specified, its assumptions validated and the measure(s) calculated. To avoid confusion, it is best to avoid using the term “margin of error” or “margin of sampling error” in conjunction with non-probability samples.</p>	<p>The sample consisted of registered voters, n= 500, with a Credibility Interval (CI) similar to a poll’s margin of error (MOE) of +/-4.3 % percentage points.</p> <p>A screening question was asked if the voter was registered and the voting intention. If the respondent said they were not registered or were not voting, they were eliminated from the sample.</p>
<p>11. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported.</p>	<p>The data was weighted gender, education, ethnicity, age, and region. 2016 primary vote magnitude was used.</p>
<p>12. If the results reported are based on multiple samples or multiple modes, the preceding items will be disclosed for each. Reviewer: Type NA if not applicable.</p>	<p>N/A</p>
<p>13. Contact for obtaining more information about the study.</p>	<p>emersonpolling@emerson.edu</p>

New Hampshire Daily Tracking Survey (Online)

1. To start, can you please tell me your gender?

Male

Female

2. What is your party registration?

Democrat (end)

Republican

Independent/other

Not registered to vote (end)

3. How likely are you to vote in the Republican Primary on February 11th?

Voting in a different primary (end)

Not Likely (end)

Somewhat Likely

Very Likely

Unsure (end)

4. Who would you be most likely to vote for in the Republican primary?

Donald Trump

Bill Weld

5. For statistical purposes only, can you please tell me your ethnicity?

Hispanic or Latino of any race

White or Caucasian

Black or African American

Asian

Other or multiple races

6. What is your age range?

18-29 years

30-49 years

50-64 years

65 or more years

7. What is the highest level of education you have attained?

High school or less

Some college

College graduate

Postgrad or higher

8. Which of the following political ideologies do you most identify as?

Very Liberal

Somewhat Liberal

Moderate

Somewhat Conservative

Very Conservative

9. What congressional district do you live in?

https://upload.wikimedia.org/wikipedia/commons/thumb/2/26/New_Hampshire_Congressional_Districts%2C_113th_Congress.tif/lossless-page1-250px-New_Hampshire_Congressional_Districts%2C_113th_Congress.tif.png

District 1: Rep. Chris Pappas (D)

New Hampshire Daily Tracking Survey (IVR)

1. To start, can you please tell me your gender?

Press 1 for Male

Press 2 for Female

2. What is your party registration?

Press 1 for Democrat (end)

Press 2 for Republican

Press 3 for Independent/other

Press 4 for Not registered to vote (end)

3. How likely are you to vote in the Republican Primary on February 11th?

Press 1 for Voting in a Different Primary (end)

Press 2 for Not likely (end)

Press 3 for Somewhat likely

Press 4 for Very likely

Press 5 for Unsure (end)

4. Who would you be most likely to vote for in the Republican primary?

Press 1 for Donald Trump

Press 2 for Bill Weld

5. For statistical purposes only, can you please tell me your ethnicity?

Press 1 for Hispanic or Latino of any race

Press 2 for White or Caucasian

Press 3 for Black or African American

Press 4 for Asian

Press 5 for Other or multiple races

6. What is your age range?

Press 1 for 18-29 years

Press 2 for 30-49 years

Press 3 for 50-64 years

Press 4 for 65 or more years

7. What is the highest level of education you have attained?

Press 1 for High school or less

Press 2 for Some college

Press 3 for College graduate

Press 4 for Postgrad or higher
