## Checklist for AAPOR TI Survey:

**New York 12th District Congressional Primary Poll (August 2022)**

<table>
<thead>
<tr>
<th>TI Disclosure Elements</th>
<th>Answers</th>
</tr>
</thead>
</table>
| 1. Who sponsored the TI Research and who conducted it. If different from the sponsor, the original sources of funding will also be disclosed. | Emerson College  
Nexstar Media                                                                                                                                 |
| 2. The exact wording and presentation of questions and response options whose results are reported. This includes preceding interviewer or respondent instructions and any preceding questions that might reasonably be expected to influence responses to the reported results. | See Below                                                                                                                                 |
| 3. A definition of the population under study and its geographic location.              | New York 12th District Democratic primary very likely voters                                                                           |
| 4. Dates of data collection.                                                            | August 1-2, 2022                                                                                                                        |
| 5. A description of the sampling frame(s) and its coverage of the target population, including mention of any segment of the target population that is not covered by the design. This may include, for example, exclusion of Alaska and Hawaii in U.S. surveys; exclusion of specific provinces or rural areas in international surveys; and exclusion of non-panel members in panel surveys. If possible the estimated size of non-covered segments will be provided. If a size estimate cannot be provided, this will be explained. If no frame or list was utilized, this will be indicated. | Data was collected using a multi-stage probability sample of 25,820 landlines provided by L2 and a list of 40,000 mobile numbers. |
| 6. The name of the sample supplier, if the sampling frame and/or the sample itself was provided by a third party. | Aristotle, LLC  
L2                                                                                                                                 |
| 7. The methods used to recruit the panel or participants, if the sample was drawn from a pre-recruited panel or pool of respondents. | N/A                                                                                                                                 |
| 8. A description of the sample design, giving a clear indication of the method by which the respondents were selected, recruited, intercepted or otherwise contacted or encountered, along with any eligibility requirements and/or oversampling. If quotas were used, the variables defining the quotas will be reported. If a within-household selection procedure was used, this will be described. The description of the sampling frame and sample design will include sufficient detail to determine whether the respondents were selected using probability or non-probability methods. | See #5                                                                                                                                 |
| 9. Method(s) and mode(s) used to administer the survey (e.g., CATI, CAPI, ACASI, IVR, mail survey, web survey) and the language(s) offered. | IVR & SMS-to-web                                                                                                                       |
10. Sample sizes (by sampling frame if more than one was used) and a discussion of the precision of the findings. For probability samples, the estimates of sampling error will be reported, and the discussion will state whether or not the reported margins of sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors. Disclosure requirements for non-probability samples are different because the precision of estimates from such samples is a model-based measure (rather than the average deviation from the population value over all possible samples). Reports of non-probability samples will only provide measures of precision if they are accompanied by a detailed description of how the underlying model was specified, its assumptions validated and the measure(s) calculated. To avoid confusion, it is best to avoid using the term “margin of error” or “margin of sampling error” in conjunction with non-probability samples.

The sample consisted of very likely Democratic primary voters, n=1,000, with a margin of error (MOE) of +/- 3 percentage points. A screening question was asked if the voter was a very likely voter. If the respondent said they were not very likely to vote, they were eliminated from the sample.

11. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported.

The data sets were weighted by gender, age, race/ethnicity, and education based on 2022 turnout modeling.

12. If the results reported are based on multiple samples or multiple modes, the preceding items will be disclosed for each. **Reviewer: Type NA if not applicable.**

N/A

13. Contact for obtaining more information about the study.

**NY-12 Poll**

1. Do you approve or disapprove of the job that Joe Biden is doing as President?
   1. Approve
   2. Disapprove
   3. Neutral/no opinion

2. Do you approve or disapprove of the job that Eric Adams is doing as New York City Mayor?
   1. Approve
   2. Disapprove
   3. Neutral or no opinion

3. What is your party registration?
   1. Not registered to vote [TERMINATE]
   2. Democrat
   3. Republican [TERMINATE]
   4. Independent or other [TERMINATE]

4. How likely are you to vote in the August 23rd primary for U.S. Congress?
   1. Not at all likely (TERMINATE)
   2. Not very likely (TERMINATE)
   3. Somewhat likely (TERMINATE)
   4. Very likely

5. Which primary do you plan to vote in on August 23rd?
1. Democratic primary
2. Republican primary (TERMINATE)
3. Unsure (TERMINATE)

6. In the Democratic primary for U.S. House District 12, who do you plan to vote for?
   1. Jerry Nadler (GO TO 8)
   2. Carolyn Maloney (GO TO 8)
   3. Suraj Patel (GO TO 8)
   4. Mike Fitzgerald (GO TO 8)
   5. Vladimy Joseph (GO TO 8)
   6. Ashmi Sheth (GO TO 8)
   7. Undecided

7. Although you are undecided, which candidate are you leaning towards at this time?
   1. Jerry Nadler
   2. Carolyn Maloney
   3. Suraj Patel
   4. Mike Fitzgerald
   5. Vladimy Joseph
   6. Ashmi Sheth

8. Which of the following issues is most important in determining your vote for U.S. Congress?
   1. Guns and crime
   2. Abortion
   3. Economy/inflation
   4. Homelessness/housing
   5. Transportation infrastructure
   6. Bipartisan gridlock
   7. Something else

9. How much of a difference do you think the gun safety legislation recently passed by Congress will have on the amount of gun violence in America?
   1. I have not heard of this legislation
   2. A major difference
   3. Some difference
   4. No difference

10. How important is diverse representation in determining your vote for U.S. Congress?
    1. Very important
    2. Somewhat important
    3. Not too important
    4. Not at all important

11. Following the overturn of Roe v. Wade, how concerned are you about Obergefell v. Hodges, which legalized same-sex marriage in the US, being struck down by the Supreme Court?
    1. Very concerned
    2. Somewhat concerned
    3. Not too concerned
    4. Not at all concerned

12. Should Joe Biden be the Democratic nominee for president in 2024?
13. Do you support or oppose a congestion pricing plan that would add tolls for drivers who travel south of 60th street in Manhattan?
   1. Support (GO TO 16)
   2. Oppose (GO TO 15)
   3. Unsure (GO TO 14)

14. Would you be more likely to support tolls for drivers who travel south of 60th street in Manhattan if residents were exempt, or residents received a discounted rate?
   1. Yes, but only if NYC residents receive a discounted rate (GO TO 16)
   2. Yes, but only if NYC residents are exempt (GO TO 16)
   3. Unsure (GO TO 16)

15. Would you support tolls for drivers who travel south of 60th Street in Manhattan if residents were exempt, or residents received a discounted rate?
   1. Yes, but only if NYC residents receive a discounted rate
   2. Yes, but only if NYC residents are exempt
   3. No, I would still oppose the tolls

16. Please tell me which one of these racial or ethnic groups you identify with.
   1. Hispanic or Latino of any race
   2. White or Caucasian
   3. Black or African American
   4. Asian American or Pacific Islander
   5. Other or multiple races

17. What is the highest level of education you have attained?
   1. High school or less
   2. Some college but no degree
   3. College graduate
   4. Post-graduate school or advanced degree

18. What is your age?
   1. 18-29 years
   2. 30-49 years
   3. 50-64 years
   4. 65 years or over

19. Who did you vote for in the 2020 election?
   1. Joe Biden
   2. Donald Trump
   3. Someone else
   4. Did not vote

20. Can you please tell me your gender?
   1. Male
   2. Female
   3. Nonbinary or other
21. What is your zip-code?
